SOFTUB

THE GO-ANYWHERE SPA

Softub has ushered in a new era in relaxation. Softubs are light, portable, comfortable, and environmentally friendly. Whether inside or outdoors, a Softub can transform your favorite place into an oasis of relaxation!

Inside Softub Spas' deceptively simple appearance is a bounty of technological innovations, including its unique, soft-but-remarkably durable wall construction and its ingenious heat recovery system that keeps water at an ideal temperature using a standard 120V 15 amp outlet!

SIX REASONS TO OWN SOFTUB

1. PORTABLE

Light, simple to use, and simple to install, Softubs are the most portable hot tubs in the world; you are never limited to one location.

3. ENERGY EFFICIENT

Softub's Heat Recovery Technology incorporates the pump motor and heating into a single Hydromate Unit. The excess heat from the motor is used to heat the filtered water, keeping energy consumption to a minimum.

2. WEATHER RESISTANT

No matter the weather – sun, rain, frost, or snow – Softub hot tubs' LeatherTex™ exterior is created for long life.

4. COMFORTABLE

Softubs are unsurpassed in comfort and convenience! The soft but stable design of the Polybond interior provides comfort for any position.

5. APPEARANCE

Softubs are available in six designer exterior colors that complement any décor.

6. EVERYTHING'S INCLUDED

With purchase, you get the Softub hot tub, Hydromate Power Pak, Sealed High Density Insulated Cover, Underwater Illumination & Therapy Seat (300+only), your choice of exterior decorator colors, and a 5-year limited warranty.

HOT TUB

WELLNESS

With regular use, Softub can bring more vitality into your life. The warm water massage encourages blood circulation and can activate the body's own natural healing powers. Massage doesn't just relieve tension – it also aids the recovery process for stressed body parts. A soak in a Softub helps to release endorphins, naturally reduces pain, and encourages feelings of happiness.

The heat raises the body temperature, allowing blood vessels to expand and absorb more oxygen. Soaking in warm water helps to keep the skin's blood vessels and the connective tissues elastic and healthy. The particular physical advantages to submerging the body in water are optimized, as total body weight is reduced by approximately 30%. The apparent weightlessness can also help treatment against chronic and rheumatic diseases, alleviating pressure on joints and soothing sore muscles.

A soak in a Softub stimulates metabolism and can improve general health. This "home therapy" can also treat conditions such as insomnia and stress and help you get a good night's sleep.

FOR THE SAKE OF
YOUR HEALTH

BODY & SOUL

Depending on the focus of the individually adjustable massage jets, your Softub Hot Tub can provide effective hydrotherapy – preventing and treating physical ailments.

DISCLAIMER:

Water has become its own personal spokesman for stress relief and exercise fun. With the current trend for alternative medicine on the up, our brochure suggests ways to solve even the slightest problems you face in your everyday life.

MORE THAN JUST A HOT TUB

Spending more time with the family and friends is a resolution that's often forgotten as a result of lack of time or ideas. A Softub allows you to relax with your family, requiring no planning or stress. You and your family can enjoy being together from the comfort of your own home.

A Softub Hot Tub is an ideal meeting place for the whole family for fun and laughter, any time, any day, in any weather.

A PARADISE
FOR CHILDREN, TOO

THE ECO-ADVANTAGE

HYDROMATE

The Hydromate® contains the unit's pump, motor, and heating system. Thanks to the clever arrangement of these technical components, a Softub's water is heated using the motor's excess heat. This environmentally-friendly process reduces power consumption to about 1 kWh – less than a microwave uses to heat a meal.

ENERGY EFFICIENT

Because it can be plugged into any standard 120V, 15 amp outlet and in light of the design of the Hydromate system, the Softub is the most energy-efficient hot tub, gallon for gallon. The sealed, high density insulated cover keeps the heat from escaping when not in use. A Softub spa can be kept at 104 and used for 20 minutes every day for an average cost of less than \$10 per month*!

* LESS THAN \$10 PER MONTH! Softub hot tubs are remarkably inexpensive to operate. The calculations are based upon California Energy Commission protocol, using a 220 Softub every day for 20 minutes, with jets on. The water temperature was maintained at 102° F at all times, with an outdoor ambient temperature at 60° F or lower. Using the national average cost of electricity.

SMARTCHIP

Intelligent technology: with the Smartchip, Softub hot tubs maintain the set temperature on the control panel by turning the pump on and off automatically. The built in safety mechanism prevents the tub from overheating if there's a problem with the temperature sensors as well as prevents the pump from turning on if the temperature is too high. The Smartchip also prevents the pump from turning on if the voltage is too low and could damage the pump.

ENVIRONMENTALLY FRIENDLY

RELAXATION

AT THE TOUCH OF A BUTTON

LEDS

Underwater LEDs are integrated into the Softub 300+, allowing you to create an inviting atmosphere. Whether you choose a warm orange, a nautical blue, a vitalizing green, or a stimulating gradient, Softub LED lighting offers individual lighting to suit any mood.

CONTROL PANEL

The control panel allows you to set the water temperature, jet intensity, and light effect. With a

userfriendly control panel, all hot tub models can be turned on or off very simply.

HYDROJETS

Hydrojets are specialized massage jets activated on the control panel, allowing you to precisely define the intensity of the massage and the body part you wish to target. This guarantees you a massage exactly tailored to your individual needs.

REASSURINGLY SECURE

THERMO-COVER

Even when not in use, your Softub will stay secure and energy-efficient. A special cover protects the unused hot tub from debris and pollution. The cover's excellent thermal insulation also prevents heat and fluid loss; the water temperature will only decrease slightly, and any condensation formed will go straight back into the tub.

SECURITY SEAL

To prevent unauthorized usage, Softub has developed a system with four locking points; when not in use, the strong straps are secured with safety clips to keep the hot tub closed. It can then be locked with a customizable code.

WEATHER-RESISTANT & **COMFORTABLE**

POLYBOND®

The interior of the Softub is made from Polybond. Originally developed for furnishing space capsules, the material is characterized by its excellent thermal insulation and low weight. Polybond also offers great structural stability but still remains soft, offering comfort in sitting and lounging positions across the hot tub.

LEATHERTEX®

The outer casing of the Softub is made from LeatherTex, a material sourced from premium yacht construction and so noted for its great durability and weather resistance. It easily withstands UV radiation, scorching summers, and harsh winters. The elegant leather look also adds a touch of style to any room or garden.

FINALLY...
A SPA MADE WITH YOU

POSSIBILITIES

ANY TIME, ANY PLACE

Whether in your yard or in your home, during spring, summer, fall, or winter, Softub offers you the possibility of relaxing whenever you want. Whether you enjoy a soak indoors or outdoors, enjoy the freedom that Softub gives you.

THE FEELING OF LUXURY

Hot tubs are one of the ultimate luxuries. With Softub, you can turn any space into the sanctuary of your dreams.

SIMPLE

AS 1, 2, 3

1. ROLL

Roll your spa into position. Your Softub can be rolled through any standard door or yard gate with ease.

2. CONNECT

Once you place your Softub where you want it, simply connect the Hydromate with just a few turns of a screwdriver.

3. FILL

Fill with water and connect to any standard 120V, 15 amp outlet.

Then enjoy your oasis of relaxation.

THE COMPANY

QUALITY FOR MORE THAN 25 YEARS

Softub was founded in 1981 by Tom Thornbury in Los Angeles, California. Production of Softub hot tubs is done exclusively in the U.S., with all finished products subject to strict international quality controls. Softubs are distributed in the U.S. and throughout the world.

SAFETY- TESTED

All domestic Softub hot tubs are built to meet or exceed Electric Spa, Equipment Assembly, and Associated Equipment standards, and Softub is certified by ETL. Softubs are also manufactured in accordance with the American National Standard for Portable Spas (ANSI/NSPI-6 1999), and Softub covers meet or exceed ASTM F 1346-91, the standard performance specifications for safety covers and labeling requirements for all covers for spas and hot tubs. In addition, Softubs have received documentation from the California Energy Commission (CEC) as being the most energy-efficient hot tub, gallon for gallon.
